16384-4417	BULKIMPORT: Discards are logged as Rejects
16384-4481	vxws: VXWS.ini missing variables for ImageServer

Enhancements in Voyager® 7.0.3

Masking of User Passwords in System Administration

Voyager® 7.0.3 protects user login information by masking the passwords for all staff operators in the System Administration client. User passwords will be masked from view to preserve the privacy and ensure security of the information.

It is possible to reset the operator's password by entering a new password in the operator profile display. If you have forgotten or misplaced the password for the SYSADMIN operator and therefore cannot access the System Administration client, please call Voyager® Customer Support. They can reset the SYSADMIN password to the default password of EISI.

Reference to Technical Documentation

Refer to Chapter 1 of the Voyager® 7.0 System Administration User's Guide for more information on this new enhancement.

Displaying Media Bookings in the My Account Display in WebVoyáge

Purpose of Enhancement

The purpose of the enhancement is to display media booking information in the patron's "My Account" view in WebVoyáge.

Description

Upcoming reservations and current bookings information can be displayed in the patron's "My Account" view in WebVoyáge. From this display, a patron will be able to view or cancel his/her upcoming reservations, and view the details of current reservations.

This feature already exists in WebVoyáge Classic.

Implementation Notes

Required configuration for this feature can be found in the webvoyage.properties file.
The following is a sample from the `webvoyage.properties` file:

```
option.mediaBookings.patronInfoDisplay=Y
```

Reference to Technical Documentation

Refer to Chapter 28 of the *Voyager® 7.0 WebVoyáge Architecture Overview and Configuration Guide* for more information on this new enhancement.

Hook to Holdings Display for Citation Databases in WebVoyáge

Purpose of Enhancement

The purpose of the enhancement is to display holdings information for citation records when viewed in WebVoyáge.

Description

Voyager®'s Hook to Holdings feature allows a library to display holdings information along with the citation record in WebVoyáge.
The Hook to Holdings profile is created in System Administration. When used with a citation database, WebVoyáge displays the library's holdings along with the citation display in WebVoyáge.
This feature already exists in WebVoyáge Classic.

Reference to Technical Documentation

Refer to Chapter 26 of the *Voyager® 7.0 WebVoyáge Architecture Overview and Configuration Guide* for more information on this enhancement.

Links to Objects Stored in Voyager® ImageServer from WebVoyáge

Purpose of Enhancement

The purpose of the enhancement is to link to objects stored in ImageServer® and display the objects in WebVoyáge.

Description

Voyager®'s ImageServer module provides the ability to catalog digital objects and make them available through WebVoyáge. This feature provides the ability to display these digital objects in the newly-redesigned WebVoyáge user interface.
This feature already exists in WebVoyáge Classic.

Implementation Notes

WebVoyáge uses the following files to implement the ImageServer feature:

- `webvoyage.properties`
- `display.xsl`

- `resultsFacets.xsl`

Reference to Technical Documentation

Refer to Chapter 29 of the Voyager® 7.0 WebVoyáge Architecture Overview and Configuration Guide for configuration information on this enhancement.

Linking to DOIs and URNs from WebVoyáge

Purpose of Enhancement

The purpose of this enhancement is to provide a mechanism to link to remote objects when using a digital object identifier (DOI) or uniform resource name (URN) as the address.

Description

WebVoyáge provides the ability to link to remote objects referenced by either a digital object identifier (DOI) or a uniform resource name (URN).
This feature already exists in WebVoyáge Classic.

Implementation Notes

Required configuration for this feature can be found in the `webvoyage.properties` file.
The following is sample information for this feature from `webvoyage.properties`:

```
# Print property DOI and URN URL to convert the DOI and URN to the physical
# location of the digital item
#=====================================================================#
property.DOI=http://hdl.handle.net/
property.URN=http://hdl.handle.net/
```

Reference to Technical Documentation

Refer to Chapter 25 of the *Voyager® 7.0 WebVoyáge Architecture Overview and Configuration Guide*.
