## **1 Document Control**

---

### **1.1 Amendment History**

| <b>Version</b> | <b>Date</b> | <b>Description</b>                             | <b>Initials</b> |
|----------------|-------------|--|-----------------|
| 1.0            | 30/03/00    | Current and Initial Version (awaiting testing) | KM              |
|                |             |  |                 |
|                |             |  |                 |
|                |             |  |                 |
|                |             |  |                 |
|                |             |  |                 |

---

### **1.2 Filename Path**

Document can be found at the following path:

\\lib-srv4\images\document\training\train0034.doc

---

---

## **2 Introduction**

This document allows you to install Adobe Acrobat PDF writer. The writer is free so we can install it by itself and not include Acrobat Capture.

---

### **3      Pre-Requisites**

Some installation experience and access to N:\

---

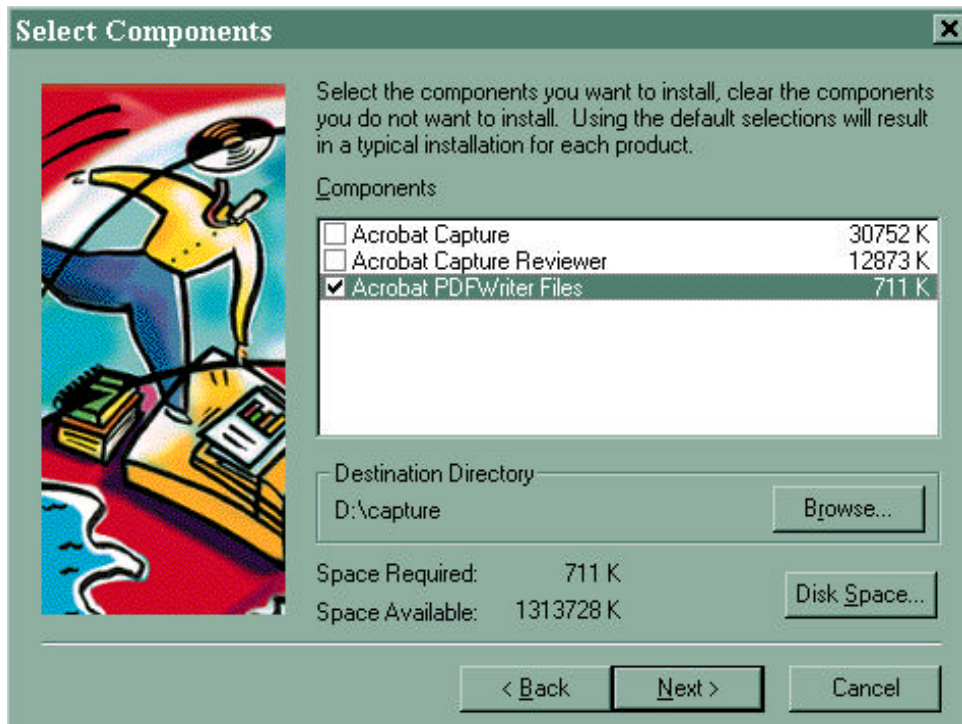

## 4 Step by Step Instructions

- Go to My Computer and choose the N:\ drive (mapped to \\lib-srv4\images). If you don't know how to map a drive, see train0035.doc.
- Double-click to open the directory "Capture2" in N:\
- Double-click on setup.exe to start the Install Shield Wizard, you will get the following screen, click NEXT.

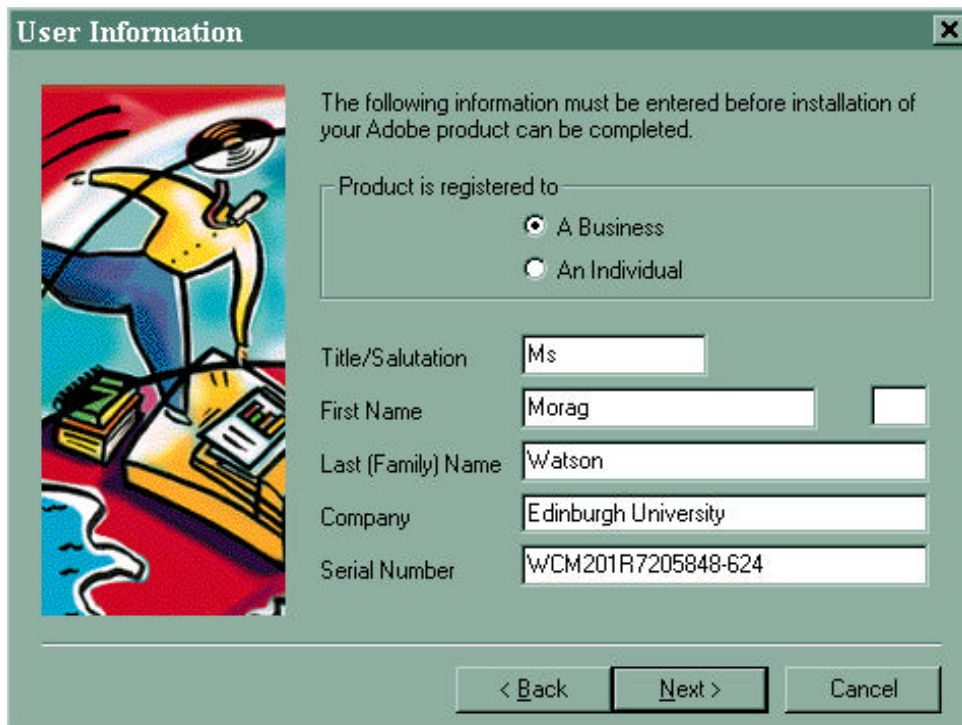

- Click YES to the accept the License Agreement.
  - Make sure only the "Acrobat PDFWriter Files" Option is ticked, as installing Capture is in breach of our license agreement.
-

- Now change the Destination directory to d:\capture. Once your screen is the same as that below, click NEXT.

- You will now be asked for the User Information...fill in as follows:

- Click on NEXT to continue.
- Click YES to accept the information is correct.
- When the final screen comes up, clear both ticks and click FINISH.
