

## Installing Arabic RLIN

1. CD-Rom drive
2. Copy w41b1.exe file off into temp folder and run. Leave all defaults as given
3. Copy Arabic fonts from CD (settings, control panel, fonts, delete 4 ArabicRLG fonts and then <file> <install new font> and copy from CD)
4. Go to WINRLIN folder and create shortcut
5. Add to the path for the shortcut /TERMTYPE: DSNONROMAN (so path should be something like C:\WINRLIN\WINRLIN4.EXE /TERMTYPE:DSNONROMAN) n.b. if installing chinese rlin put /TERMTYPE:DSCJKPC rather than above.
6. Run the shortcut and open a default session
7. In <Settings> choose <communications> and change address and port to **mercury.thames.rlg.org** and **2517**
8. In <Terminal settings> change Enter key to 'send message' and choose <optimise for Arabic>
9. In <Pass command> change pass destination to disk file and change path to H:\RLIN.SAV and up the timeout to at least 60
10. In <Session> save session as e.g. Arabic RLIN
