1.1 Amendment History

Version	Date	Description	Initials
1.0	03/02/99	Current and Initial Version (awaiting testing)	SM

1.2 Filename Path

Document can be found at the following path:

\lib-srv4\apps\systems\training\train0027.doc

2 Introduction

This explains the steps to restart the Ultranet30 Server on Lib-srv5 when the CD rom network is not responding. Users receive an error message about too many/few pipe instances.

3 Pre-Requisites

Administrator rights to Lib-srv5

4 Step by Step Instructions

1. Log onto the Lib-srv5 as administrator.
2. Lib-srv5 should be showing an error box with the title DR WATSON FOR WINDOWS NT. If it is not then report to Morag or Keith what is on the screen.
3. If the error box is showing click OK.
4. Check to see if a button for Ultranet30 Server is on the task bar. If it is then click on it and report to Morag or Keith what is on the screen.
5. If Ultranet30 Server button is not on the task bar then double click the Ultranet30 Server icon to start the programme
6. Lock the workstation by using Ctrl, Alt, Delete
