

Voyager ® 7.0.1 Bug Fixes

<u>Issue</u>	<u>Summary</u>
15291	acq:bindery maintenance:run time error 13 type mismatch error
16384-1009	FT: WebV: printed or emailed item statuses display as "no information available"
16384-1026	FT: WebV: Adding titles to "My List" results in an internal server error
16384-1057	FT:webv:copy number does not display
16384-1059	FT:CAT: Toolbar Text option does not remove gray space
16384-1105	New WebV: Blank or limited titles list after keyword search
16384-1137	webvoyage.properties: comments do not specify how to include a new basic search
16384-1153	ALL staff mods:Search form no longer shows limits are in effect
16384-1154	CAT:View line items in Acquisitions keyboard shortcut (cntrl+M) disappeared
16384-1155	FT:ACQ/CAT:print labels blank when from item record
16384-1157	FT: Voy 7.0 MARC posting works from CAT but not from CIRC or ACQ
16384-1169	WebV/Cat: discrepancy between lang.cfg, limits.ini/xml and published Marc codes
16384-1185	WebV:Request Form:Instructions cut off at 57 even though max is 1000
16384-1201	WebV:OPAC Request Form:Copy information goes off page
16384-1203	FT: UB: no SupplyDefaultPickupLocs option
16384-1217	FT:WebV:Advanced search:Non-keyword searches available (GPO)
16384-1265	FT: UB: UB Requests from single db or multiple db simulsearch result in errors
16384-1313	FT webv: "My Searches" ISE for patrons with searches saved in previous versions
16384-1393	Voy/Primo extract script: Diacritics in 949 field not extracted correctly.=
16384-145	UB/Circ:if phone type mismatch between home and stub can't renew/charge items
16384-1489	FT WebV: left-anchored call# searches failing and killing keysvr
16384-1505	FT:WebV/SimulSearch:Local database name not displaying consistently
16384-1521	FT: WebV: "Course Reserves" needs session
16384-1537	FT:WEBV:Clusters/UB:Don't get Home Library field on Patron Login page
16384-1553	webv:record display does not show temporary location
16384-1569	FT:CAT:Get Bib button does not work with new mfhd
16384-1570	FT WebV: Searching with diacritics/non-Roman characters leads to no results
16384-1585	FT WebV: After no-hits redirect, local search button searches remote db
16384-1601	FT:new WebV:Patrons with blocks are unable to log in to their account
16384-1681	FT:WebV:AUTHOR search tab:ignoring first name
16384-1697	FT WebV: Database name doesn't display on titles list for remote searches
16384-1729	FT: webv: cannot remove select all option from charged items list
16384-1746	FT WebV: emailed records garble diacritics
16384-1777	FT WebV: Subject search doesn't truncate; search tips say it does
16384-1778	WebV:AJAX Sort By function activates previous Heading search
16384-1779	FT: New WebVoyage ignores Records per Page on re-sort
16384-1794	FT CAT: Hierarchy display gives error 438 for bound-with items
16384-1857	FT: WebV: Error displaying records with 773 g
16384-1905	WebV:self renewals in WebVoyage successful even when should be blocked

16384-1937	Patron blocks allow renew even when patron at limit of number of overdue items
16384-2018	VOY: Cannot view records in webv or cat:RetrieveLinkBibs ERROR in log.voyager
16384-2020	FT:WebV: Unicode font still not called by CSS
16384-2050	FT:Find call number search other than CALL:"could not retrieve search results"
16384-2098	FT:UB/CS: Full stub not created/patron name not displaying in call slip
16384-257	ACQ: No order to related invoices
16384-625	CIRCJOB:circjob 43 logging incorrectly
16384-626	Pprimoexp: Availability not extracted for itemless mfhdls
16384-689	FT:CAT/OPAC:single 852h displays as h in titles list instead of character
16384-721	INDEXGEN:regen failing with core:in Cat Run-time error 440
16384-802	FT: WebV: Default fonts in CSS are not unicode
16384-817	SA:can't edit "Stop Fines/Fees, Notices for Claims Returned Items"
16384-835	WebV: NewVoyage file resultsFacets.xsl has caret Ms as delivered
16384-849	VOY: No logging of Pprimoexp process
16384-867	VOY: Voyager-Primo extract incorrectly handles "Suppressed in OPAC" for MFHDs
16384-881	WebV: [FT] Apache configs for skins are incomplete
16384-897	ACQ:CAT:CIRC:ISBN 13 validation
16384-898	ACQ:CAT:CIRC ISBN validation when ISBN contains an 'X'
16384-914	ACQ:CAT:CIRC:ISSN validation at end of value
16384-929	FT:CAT:Overlay does not include Operator ID in History
16384-945	CAT:FT: Hierarchy displays title inconsistently
16384-961	FT: WebV 7 duplicates 866 display
16384-979	FT: WebV: Titles list shows "No Call Number" when multiple MFHDs are attached
16384-993	FT: controlling order of entries in drop-down boxes
17179	cat: dewey call number normalizing with comma instead of without
17213	circ:Patron Block messages pop-up by barcode entry, but not name.
17301	CAT: Authority Validation window doesn't disappear after "Create Auth"
17994	ptrnupd: patron update not properly handling patron_note_id
18137	ptrnupd: fields can get trailing spaces added
18216	circ:ub patron id in dbA matches patron id in db2 searching by last name
18289	UB:item has not charged & in-transit status at same time.
18375	circ:Proxies can be orphaned if the sponsoring barcode is deleted.
18500	Cat:2nd cannot use proper non-filing 2nd indicator in 880-245 tags
18713	CAT:Diacritics and Heading Validation
18737	Circ:callslip w/ place on hold shelf not using hold shelf life interval
19031	ACQ:RT Error 13 Client Quits when search for non-existent PO number
19045	INDEX:No title indices when special character or diacritic in non-filing
19107	CS:log.voyager callslipsvr errors: Could not transform tag=AU data=
19297	UB:home patron UB counters need to be resynced with stub data
19345	Voy: Cat: Pick & Scan not suppressing all bound-with Bibs

79 bug fixes in total

More details on these bugs are in the eService Knowledge Base. For information on how to search the Knowledge Base see

http://supportweb.exlibrisgroup.com/cust/voy/services/eService/cust_guide.pdf

NOTE: The fix to Issue 19297 is a new circjob: circjob 43. Please see the Voyager® 7.0 Technical User's Guide, Chapter 8 for more information on this new UB circjob.

REGEN information:

Each of the fixes listed below have a server binary component that will be delivered as part of the Voyager® 7.0.1 upgrade and also include an index correction component that requires a regen for *previously* created MARC records.

How do you know if a regen should be run? It depends on what version you are upgrading from:

- If you are upgrading from Voyager® 5 or below to Voyager® 7.0.1, a full regen will be run as part of the upgrade.
- If you are upgrading from Voyager® 6.1 or 6.2 to Voyager® 7.0.1, a full regen except for Authority Left-anchored should be run.
- If you are upgrading from Voyager® 6.5.x (6.5.1, 6.5.2, 6.5.3, 6.5.4) to Voyager® 7.0.1, running of the regens is optional. Read the information below regarding the bug fixes and regens. If you have data that relates to any of these bugs, it is recommended that the regen to fix the data be run (e.g. if you use Dewey call numbers in mfhds, the call number regen for fix to Issue 17179 should be run). Tell your Upgrade Engineer which regen(s) you would like run.

You can choose to:

- Upgrade without requesting Ex Libris to run the regens
- Upgrade and request Ex Libris to run the needed regens
- Upgrade and perform the regens yourself, if a Cert 500 site

To schedule your upgrade with an Ex Libris Upgrade Engineer:

Use [eService](#) to open an upgrade incident. Under the field “What type of difficulty are you experiencing?” select “Upgrade.”

Regens from Voyager® 7.0.1:

Issue 17179: cat: dewey call number normalizing with comma instead of without

This fix will place correct data in the left anchored call number index for holding (mfhd) records created or updated from the time of applying the patch set and onwards. Requesting the optional call number left anchored regen will correctly populate the call number left anchored index for existing holding records at the time the regen is performed. The recommendation is to request this regen if you use the Dewey call number classification scheme in holding records. The time it takes for this regen to run is dependant upon the total number of holding records in the database.

Issue 18500: Cat:2nd cannot use proper non-filing 2nd indicator in 880-245 tags

Issue 19045: INDEX:No title indices when special character or diacritic in non-filing

These fixes will place correct data in the bibliographic left anchored index records created or updated from the time of applying the patch set and onwards.

Requesting the optional bibliographic left anchored index regen will correctly populate the bibliographic left anchored index for existing bibliographic records at the time the regen is performed. The recommendation is to request this regen if your bibliographic data contains non-roman text. The time it takes for this regen to run is dependant upon the total number of bibliographic records in the database.

Regens from previous patch sets – these regens should be considered if you are upgrading to Voyager 7.0.1 from a version 6.5.2 or below

Regens from 6.5.3 patch set:

Issue 18042: cat: 2nd indicator (non-filing chars) ignored if 245 contains \$6

This fix will place correct data in the keyword and left anchored bib index for bibliographic records created or updated from the time of applying the patch set and onwards. Requesting the optional keyword and bib left anchored regens will correctly populate the keyword index and bibliographic left anchored index, respectively, for existing bibliographic records at the time the regens are performed.

The recommendation is to request this regen if you have bibliographic records with subfield 6 in the 245 tag. The time it takes for these regens to run is dependant upon the total number of bibliographic records.

Regens from 6.5.1 and 6.5.2 patch sets:

Issue 18840: WebV: Thumbnails aren't displaying

Issue 19137: CAT: multiple 856 fields cause corruption in ELINK_INDEX table

Both of these fixes (originally released in the 6.5.2 patch set) will place correct data in the ELINK indexes for edited/added bibliographic and holdings (mfhd) records, from the time of applying the patch set and onwards. Requesting the optional ELINK regen will correctly populate the ELINK indexes for existing bibliographic and holdings (mfhd) records at the time the regen is performed. The recommendation is to request this regen if you have 856 tags in either bibliographic or holdings records in your database. The time it takes for this regen to run is dependant upon the total number of 856 tags.

Issue 18872: Index/Search/Import: ISBN-13 indexing in 020 field

Issue 19075: Search: Parenthetical qualifiers are not ignored in ISB3 and/or 020A

Both of these fixes (originally released in the 6.5.2 patch set) will place correct data in the keyword index and bibliographic left anchored index for edited/added records, from the time of applying the patch set and onwards.

Requesting the optional keyword and bibliographic left anchored regens will correctly populate the keyword index and bib left anchored index, respectively, for existing records at the time the regens are performed. The recommendation is to request these regens if applying the patch set. The time it takes for these regens to run is dependant upon the total number of bibliographic records.

Issue 18949: (CAT:Heading Separators Missing)

This fix (originally released in the 6.5.1 patch set) will have the SysAdmin setting for the headings separator correctly applied for edited/added records, from the time of applying the patch set and onwards. Requesting the optional headings regen will have the SysAdmin setting for the headings separator correctly applied for existing records at the time the regen is performed. This would mean that all records will have the SysAdmin setting for the headings separator correctly applied. There is no recommendation on requesting this regen as this is strictly a display issue.
