# Techtip Number 11 - Configuring Doctor Solomon's Virus checker on the common desktop

In order to do this you must first go to the task bar on the common desktop. This is the bar at the very bottom of the screen which shows which applications (programs) you are using at the time.
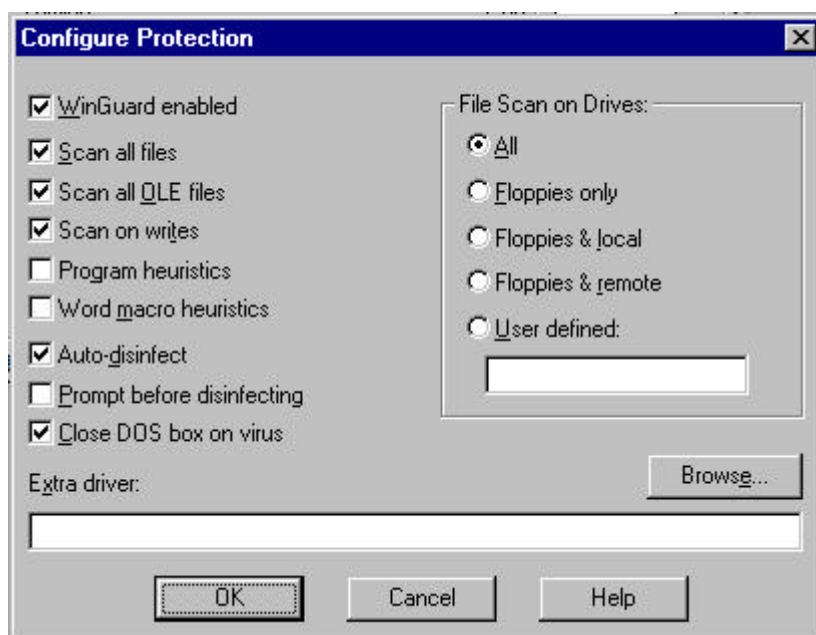

Move to the far right of the taskbar and click on the Doctor Solomon's icon

The following screen will appear. Click on <u>C</u>onfigure, <u>P</u>rotection to display the "Configure Protection" screen.

Ensure the screen is set up in the following way. Click on the boxes to turn the settings on or off. When you are satisfied your setup looks like this, click on "OK".

The above setting will ensure your virus checker disinfects automatically, and checks all drives including the network.
