Voyager printing

Open a telnet session for Harry and login

To get to directory type the following:
cd /m1/voyager/eddb/sbin
Then type **Pcircjob** to get to the circ server jobs
We need to run jobs 1,2,3,5 and 13 daily.
To do this choose number, once run type **Pcircjob** again to get to the list.

ECA and ROE jobs:
We need to run jobs 1 and 13 daily for both sites. To do this after running ours you need to quit from the circ jobs list (**99**)
> N.B. There are two ways of changing into the ECA and ROE directories. Either going back up to the directory which contains all the databases. This directory is /m1/voyager if you do cd /m1/voyager and type ls you will see a list of what is inside that directory.

1.
From /m1/voyager/eddb/sbin type
cd /m1/voyager/ecadb/sbin
Then type **Pcircjob**

Or

2.
From /m1/voyager/eddb/sbin
To go up a level type **cd..** you need to get to the /m1/voyager directory so you need to type **cd..** again. This should leave you at the path /m1/voyager.
Then type **cd ecadb**
Then type **cd sbin**
Then type **Pcircjob**

Run jobs **1** and **13** for the ROE. For ECA run jobs **1** and **13** and also job **5** daily.

Weekly Acq jobs:
On a Monday and Thursday we run Acq jobs for our database:
cd /m1/voyager/eddb/sbin
Then type **Pacqjob**
Choose job number **1**
When it's run **99** quit

Weekly Circ jobs for us and ECA
cd /m1/voyager/ecadb/sbin
Then type **Pcircjob**
Run job **24** Transactions Exceptions Report
99 Quit
cd /m1/voyager/eddb/sbin
Pcircjob
Run job **24** Transactions Exceptions Reports
99 Quit
