![ExLibris Voyager logo]

This document describes the files in the skin directories changed from 8.1.0 to 8.1.1 as well as what has been changed within the skin files. It is meant to be used when planning for the best way to carry your skin-level customizations from a previous version of WebVoyáge forward to version 8.1.1. If you have not altered a file, you can copy the new 8.1.1 version over the existing file in whatever skin you would like. If you have customized a file, we recommend that you review the changes below but recommit your customizations to the *new* file. Test your skin after each customization is reapplied to the new files.

If you are upgrading from a version of Voyager prior to 8.0.0, please note that there is not a Changed Skin Files document. Since the process for upgrading to Voyager 8.0.0 requires that you begin with the Voyager 8.0.0 version of all skin files, no list of changed files is necessary.

Please see the Voyager 8.1.1 Release Notes for specific bug fixes that affect skin files. The Release Notes can be found on the Documentation Center under
Documentation Center under Home > Documentation Center > Ex Libris Documentation Center > Voyager > Up grade Release Planning > 8.1.1.

Changed skin files from 8.1.0 to 8.1.1

The following skin files changed in 8.1.1.

The files below are all in the directory, /m1/voyager/xxxdb/tomcat/vwebv/context/vwebv/ui/exl_default/ (e.g. the first one is /m1/voyager/xxxdb/tomcat/vwebv/context/vwebv/ui/exl_default//htdocs/help/index.html):

   …/htdocs/help/index.html
   …/webvoyage.properties.tml
   …/webvoyage.properties
   …/xsl/contentLayout/cl_exportRecordDialog.xsl
   …/xsl/contentLayout/cl_printRecordDialog.xsl
   …/xsl/contentLayout/configs/displaycfg.xml
   …/xsl/contentLayout/configs/emailcfg.xml
   …/xsl/contentLayout/configs/print/briefRecordConfig.xml
   …/xsl/contentLayout/configs/print/fullRecordConfig.xml
   …/xsl/contentLayout/display/display_text.xsl
   …/xsl/contentLayout/display/display.xsl
   …/xsl/resultsMyList.xsl
   …/xsl/resultsTitles.xsl

Also:
   /m1/voyager/xxxdb/tomcat/vxws/context/vxws/ui/exl_default/vxws.properties
   /m1/voyager/xxxdb/tomcat/vxws/context/vxws/ui/exl_default/vxws.properties.tml

The upgrade to 8.1.1 will overwrite your exl_default directory with all of the new files listed above, as well as the default versions of all other WebVoyáge skin files.

Skin file content changes 8.1.0 to 8.1.1

Below contains exactly what has been changed in each exl_default changed skin file for 8.1.1.

/m1/voyager/xxxdb/tomcat/vwebv/context/vwebv/ui/exl_default/htdocs/help/index.html
